

Policy document for student performance improvement

I. Timely Administration of CIE.

Continuous internal evaluation (CIE) is an effective tool and this performance is considered as

major component in all theory courses. An effective learning environment motivates and stimulates students learning process. To maintain the quality of education, structured reforms have been framed.

- Emphasis on continuous internal assessment to reduce the load on students by inculcating regular study habit in them.
- The chairman of the Internal Assessment Committee (IAC) will convene a meeting once in four months and additional implementations to be made will be discussed and implemented.
- Members of IAC have decided to modify the question papers of internal assessments by adding external choice pattern or internal choice pattern for yearly and semester systems which may include long type and short type subjective questions.
- Typed examination question papers will be submitted in a sealed envelope to the internal assessment convener 1 week prior to the examination.
- The in charges of the internal assessment monitoring committee will take care about the Photocopy of the internal assessment question papers and those papers will be returned to the HODs/In charges in a sealed envelope one day before the examination.
- The evaluated answer scripts alone with the marks statement will be sent to the convener concerned of the internal assessment monitoring committee for scrutiny within 1 month.
- The convener of IAC will check whether all the questions have been evaluated and are allotted marks for.
- After scrutinization of the answer scripts by the conveners, all the answer scripts will be sent to the chairman of internal assessment monitoring committee for the final scrutiny.
- After final scrutinization, all the answer scripts will be returned to the respective departments.
- The HODs will be requested to take necessary action to maintain the confidentiality of
 it. They will also despatch the marks to the university for tabulation of internal
 assessment marks in student's main Tabulation Record Sheet (T.R Sheet) and also
 keep a copy safe in the institutional department.
- The students who performed poorly, will be given feedback forms to mention reasons for the same, and also mention steps to be taken to improve their performance in future examinations.

- Along with the internal mark sheets, a copy of absentees and failures with reasons and the action plan to be taken by the mentor for their improvement to be submitted within 20 days from the date of examination.
- Continuous performance assessment forms have to be filled regularly by the respective mentor.
- The co-operation of all the HODs will be required for the smooth conduction of the internal assessment examination.

Nature of the Internal Assessment and their frequency

BPT

- Written Internal Assessment: Minimum 2 per Semester
- 2. Assignment: 3 per semester
- 3. Model Pre-University Examination: 1 per Semester

BASLP

Semester Pattern

- Written Internal Assessment: 1 per Semester
- 2. Practice Examination: 2 per semester
- 3. Model Pre-University Examination: 1 per Semester

Yearly Pattern

- Written examination: 1 per year (six months)
- Practicum examination: 2 per year.
- 3. Model Pre-University Examination: 1 per year

II. On time Assessment & feedback

Continuous assessment is an important component in academics which encourages the students to work systematically throughout the year. Hence maintaining the transparency in conducting examinations will enhance the morale of the students.

Measures to be taken to ensure transparency and robust internal assessment:

- The internal assessment examinations in each semester/year will be scheduled according to the university and planned at the convenience of the academic calendar.
- Every department will prepare two question papers out of which one paper will be selected by the convener of internal assessment committee to avoid bias.
- The convener of the internal assessment committee collects the question papers of the respective departments and maintains the confidentiality by personally taking the Xerox.

INSTITUTE OF HEATLTH SCIENCES

- Single copy of all the question papers for all the academic years will be preserved in a file and maintained by the convener of IAC.
- All the examinations will be conducted in the classroom which is under a strict surveillance by the faculty members as well as by the close circuit cameras.
- · The sealed envelope containing question papers will be opened in front of the convener of the internal assessment committee just before the commencement of the examination.
- Internal assessment examinations will be conducted and the evaluation will be done as per the predetermined date by the IAC.

III. Make-up Assignments/ tests

Being aware of why we are testing students and what exactly we want to test can help make students' and instructors' experience of exams more useful. The following tips will help you towards issues you should think about during the entire exam process, from planning to reflection.

What you want to assess should be related to your learning outcomes for the course.

- Knowledge: You can design your test questions to assess students, knowledge or ability to apply material taught in class.
- Process: You can test students' reasoning skills and evaluate the process by focusing the marks and other feedback on the process they follow to arrive at a solution.
- The communication of ideas: You can evaluate students, communication skills their ability to express themselves – whether this is by writing or creating a scientific proof.
- Convergent thinking: You can test your students' ability to draw a single conclusion from different inputs. Or you may alternatively want them to come up with different
 - Absolute or relative standards: student success is defined by learning a set amount of material or demonstrating certain skills.

The overall exam should be consistent with your learning outcomes of the course. There are a number of ways to review and prioritize the skills and concepts taught in a course.

- Use the topics list provided in your course outline
- Skim through your lecture notes to find key concepts and methods
- Review chapter headings and subheadings in the assigned readings

S INSTITUTE OF HEATLTH SCIENCES

IV. Remedial teaching / support:

- Remedial teaching is assigned to assist students in order to achieve expected competencies to improve the students' academic skills.
- This type of special education is designed specifically for the slow learners to achieve
 their special needs after continuous evaluation and monitoring during their internal
 assessments and required measures are taken constantly like chair side viva (casebased learning), Discussions, mentor- mentee counselling sessions.

SUBJECT: PHYSIOTHERAPY IN SURGICAL CONDITION

SEMESTER: 5TH SEMESTER

QUESTION BANK

Unit 1- Genral Surgery

Long question:

- 1. Describe abdominal surgeries? Explain pre and post operative physiotherapy management and mention the associated complication?
- 2. Describe about various postoperative physiotherapeutic complication after upper abdominal surgery and its prevention and management?
- 3. Give a detailed note on appendectomy and its pt management
- 4. Define Hernioplasty. State its indication and post op pt for the same
- 5. Define total Gastrectomy. Discuss pt management of it
- 6. What do u understand by Cholescetomy. Explain in brief the various immediate and late postoperative complications with their respective preventive measures.
- 7. Write a brief note on post operative assessment and physiotherapy management after
- 8. Describe abdominal incisions used for different surgeries, give a note on appendectomy
- 9. Write about Herniorraphy, its indication, complication and its post operative management
- 10. Radical mastectomy in detail and the importance of shoulder mobility exercises in post
- 11. Define colostomy, its incision ,pre and post operative complication and management 12. Give a brief note on hysterectomy and associated complications and describe how
- physiotherapy plays a vital role in its management

Short question:

- 1. Incisions used for abdominal surgeries and incisional care
- 2. Preoperative management before radical mastectomy
- 3. Discuss in brief the indications, types of surgery, complications and therapeutic management of cholescystectomy
- 4. Discuss in brief the pt management of colostomy
- 5. Role of preoperative physiotherapy education and treatment in upper abdominal
- 6. Discuss various probable contractures and deformity after radical mastectomy and their preventive strategies'?
- 7. Discuss various incision used in abdominal surgeries and name the surgery done?
- 8. Give a brief note on pre and post operative management of abdominal surgeries

Unit 2: OBG And Gyanaecology

Long questions:

- 1. Write a detailed note on importance of antenatal and postnatal physiotherapy training and
- 2. What do u mean by prolapsed uterus and give a detailed note on its physiotherapeutic
- 3. Write a short essay on types, causes, effect and rehab of prolapsed uterus
- 4. Discuss in details of pt management of prolapsed uterus(grade2)
- 5. Give a note on pelvic inflammatory disease and its physiotherapeutic management
- 6. Write about incontinence, its type and physiotherapeutic management
- 7. Give a detailed note on pelvic floor muscles and its pre and post operative
- 8. Point out the physiological changes happening in musculoskeletal system and state
- 9. Give a detailed note on c section, its complication and its postoperative physiotherapy management

Short questions

- 1. Pelvic floor exercises
- 2. Back care during and after pregnancy
- 3. What do u understand by postnatal training
- 4. Kegals exercises
- 5. Stress incontinence
- 6. How to test strength of pelvic floor muscles

- 7. Define dysmennorhea and importance of physiotherapy intervention in it?
- 8. Different grades of prolapsed uterus and its management
- 9. Importance of physiotherapy intervention aiding in normal delivery?
- 10. Stages of labor

Unit 3 :Burn And Plastic Surgery

Long question:

- 1. Define burn &describe classification of burn and write a detailed note on its pt management and importance of hydrotherapy
- 2. Give a detail note on complication of burn and its physiotherapeutic management
- 3. Define burn and write down its physiotherapeutic assessment and management?
- 4. Define Burn, classify it and give a brief note on its assessment and physiotherapy management?
- Discuss burn injury under following heads:
- Etiology, classification, assessment, complications and physiotherapy treatment
- 7. Discuss various postoperative physiotherapy treatment after tendon transfer?
- 8. Discuss in details about complication after reconstruction surgery of hand ,after sharp tendon cut and its physiotherapy
- 9. Give a detail note on skin grafts and its physiotherapy management after the same
- 10. Enumerate various type of burns and its physiotherapy management and its importance in preventing impairment and disability after 2nd degree of lower limb burn?
- 11. Give a detailed note on complication of burn and state physiotherapy management of each complication
- 12. What are the prerequisite before a tendon transfer and give a detailed note on hand rehabilitation
- 13. Differentiate between grafts and flats and write down post operative managements of
- 14. A case of burn with BSA of 34% ,state the degree of burn and write its physiotherapy
- 15. Give a detailed note on reconstructive surgery of hand and its rehabilitation

Short question

- Write a note on tendon transfer
- 2. Write a short note on therapeutic intervention iun skin grafting
- 3. Role of electrotherapy & exercise therapy after tendon transfer of Palmaris longus to dorsum of hand.
- 4. Late complication of burn
- Use of electrotherapy in tendon transfer
- 6. First aid after burn

- Types and degrees of burn
- 8. Physiotherapy after tendon transfer
- 9. Emergency management of burn
- 10. Mention the stage of healing and its physiotherapeutic management
- 11. Write a note on flat and its post operative management
- 12. Give a note on hypertrophied scar and its physiotherapeutic management
- 13. Write a brief note on positioning as essential pt management I burn
- 14. Zones of burns
- 15. Give a note on mechanism of injury in burn

- Understand the anatomy, physiology and various conditions in Obstetrics and Gynaecological conditions relevant to Physiotherapy.
- Assess and provide physiotherapeutic techniques in Obstetrics and Gynaecole
- Conditions for relief of pain, relaxation, conditioning and posture.
- · Physiotherapeutic techniques for various conditions
