**Course Code: IHS-CER-SLP01-21**

**Course: Introduction to Hearing Loss**

**Program Duration: 16Hrs**

**Course Objectives:**

The participant will be able to:

- Understand the importance of Nonverbal communication in therapy
- Understand the importance of positive body language in a therapeutic settings
- Cultural differences in Nonverbal communication.

Topic	Duration
Lecture Introduction to hear and hearing loss	2 Hour
Lecture Anatomy of the Auditory System	3 Hour
Lecture Physiology of the Auditory System	3 Hour
Lecture Disorders of Outer ear	2 Hour
Lecture Disorders of Middle ear	2 Hour
Lecture Disorders of Inner ear	2 Hour
Lecture <b>General Overview of Audiological Intervention</b>	2 Hour

## **Certificate Course: Introduction to Hearing Loss**

**Date: 12<sup>th</sup> – 15<sup>th</sup> July 2021**

The Program started by involving the blessings of God through a lightning the lamp ceremony by Principal I.H.S., and the dignitaries, and a devotional song.

The Resource person gave an overview of Hearing Loss and how it affects the lives of people.

### **Aim and Objectives of the program**

The participant will be able to:

- Understand the Anatomy and Physiology of Auditory Pathway and the disorders of Outer, Middle and Inner ear.

### **Topics Covered:**

- Introduction to hearing and hearing loss
- Anatomy and Physiology of the Auditory Pathway
- Disorders of Outer Ear
- Disorders of Middle Ear
- Disorders of Inner Ear
- General Overview of Audiological Intervention

**Course Code: IHS-CER-PHY01-21**

**Program Duration: 24Hrs**

## **Certificate Course in Neuro - Muscular Diseases**

Neuromuscular diseases are a broadly defined group of disorders that all involve injury or dysfunction of peripheral nerves or muscle. The site of injury can be in the cell bodies, axons, Schwann cells, neuromuscular junction, muscle, or any combination of these sites. Some neuromuscular diseases are also associated with central nervous system disease, such as ALS, but most are restricted to the peripheral nervous system. This Course provided by the Indian Association of Chartered Physiotherapists will give you a deep insight of Neuromuscular Diseases that you should know, and you should apply in your daily day today practice.

Topics Touched In the Course -

- General introduction to Biological Neuromuscular Setting
- Neurophysiology & Myology
- Neuromuscular bridge/agents
- Muscle and bone palpitation
- Diseases :
  - Myopathies (in depth)
  - Neuromuscular disorders/diseases (NMD) their Identification and classification of NMD (indepth)
  - Duchenne's Muscular Dystrophy
  - Becker's Muscular Dystrophy
  - Emery-Dreifuss Dystrophy
  - Bethlem Myopathy
  - Myotonic Dystrophies
  - Facioscapulohumeral Dystrophy
  - Welander's Distal Dystrophy
  - Oculopharyngeal Muscular Dystrophy
  - Channelopathies
  - Spinal muscle atrophy
  - Activity /Participation problems in NMD
  - Electromyography
  - Assessment methods in rehabilitation of NMD
  - Taping Technique

Director  
Institute of Health Sciences  
Bhubaneswar

## Certificate Course in Neuro Muscular Disease

Enroll in the course to enhance you knowledge in this vast field of Neuro-Muscular Disease and credit up yourself.

### Topics to be covered

- General introduction to Biological Neuromuscular Setting

- Neurophysiology & Myology

- Neuromuscular bridge/ agents

- Muscle and bone palpitation

- Various Diseases :

- Myopathies
- Neuromuscular disorders/diseases (NMD) their identification and classification of NMD
- Duchenne's Muscular Dystrophy and other conditions

**Course Code: IHS-PRI-614-21-22**

**Program Duration: 24Hrs**

## **Certificate Course in Clinical Evaluation Of Children With Cerebral Palsy**

Cerebral Palsy is a disorder of movement and posture that appears during infancy or early childhood resulting from damage to the brain. Cerebral Palsy is the most common most common motor disability in childhood. The aetiology of Cerebral Palsy is very diverse and multifactorial. The injury to the developing brain may be prenatal, natal , or postnatal. The most important risk factor seems to be prematurity and low birth weight with risk of cerebral palsy increasing with decreasing gestational age and birth weight. Population based studies from around the world report prevalence estimates of cerebral palsy ranging from 1.5 more than 4 per 1000 live births or children of a defined age range.

### **Topics Touched In The Course –**

- a) General introduction to cerebral palsy and types of cerebral palsy
- b) Brief introduction to causes of cerebral palsy
- c) Evaluation of cerebral palsy
  - Milestones
  - Neonatal reflexes and abnormal reflexes
  - Evaluation of tone
  - Physical examination :-
    - Contractures
    - Deformities
  - Functional evaluation

**Course Code: IHS-PRI-610-21-22**

**Program Duration: 10Hrs**

## **Certificate Course on Wheelchair Prescription As Per WHO Norms**

The wheelchair is one of the most commonly used assistive devices to promote mobility and enhance quality of life for people who have difficulties in walking (e.g. a person with spinal cord injuries resulting in quadriplegia or paraplegia, muscular dystrophy, etc). Wheelchair mobility opens up opportunities for wheelchair users to study, work, engage in social activities and access services such as healthcare.<sup>[1]</sup> In addition to providing mobility, an appropriate wheelchair benefits the physical health and quality of life of the users by helping in reducing common problems such as [pressure sores](#), progression of deformities and improve respiration and digestion.

### **Topics Touched In The Course –**

Lecture 1 : - Introduction to the program and its importance

Lecture 2 :- Overview of the course

Lecture 3 :- Candidacy for wheelchair prescription

Lecture 4 :- Types and cost of wheel chairs

Lecture 5 :- Prescription as per WHO norms

Lecture 6 : - Consideration during prescription

Lecture 7 :- Care and maintenance

Lecture 8 :- Troubleshooting Tips

Lecture 9 :- Recent advances in wheel chair models

Lecture 10 :- Funding resources and agencies

## **6Hrs**

### **Certificate Course on hearing aid technology**

Aim of the workshop was to present the challenges of hearing aid signal processing to the wider speech science and speech technology communities.

Recent advances in hearing aid hardware are presenting opportunities for increasingly sophisticated processing. For example, wireless communication between the hearing aid and a mobile device can allow non-latency critical computation to be freed from the low-power constraints attendant with traditional aids. These advances raise the prospect that the computationally demanding techniques employed with great success in statistical speech modelling and statistical acoustic scene analysis could soon be exploited for hearing aid processing.

**Believe is that new directions in hearing aid research can be inspired by bringing together speech technologists and hearing researchers.** The workshop was stimulated a two-way conversation between the speech research community and hearing aid developers. Hearing aid developers, who are not typically represented at Inter-speech, will have an opportunity to present the challenges of their industry to the speech community; the speech community will be able to present and discuss potentially transformative approaches to speech in noise processing in the presence of hearing researchers and industry experts.

#### **Topics Touched In The Course –**

Lecture 1 : - Introduction to the program and its importance

Lecture 2 :- Overview of the course

Lecture 3 :- Candidacy for different type of hearing aid

Lecture 4 :- Types and cost of hearing aid

Lecture 5 : - Consideration during prescription

Lecture 6 :- Care and maintenance

Lecture 7 :- Troubleshooting Tips

Lecture 8 :- Recent advances in hearing aid
