## Course Code: IHS-VAC02-15

### Course Auditory Processing Disorders

### Program Duration: 15Hrs

### Course Objective:

The Participant will be able to understand:

- Auditory Processing Disorders
- Assessment and management of APD
- Differential diagnosis of ADP

Topic	Duration
<b>Lecture 1 APD an overview of the buffalo model</b>	2Hour
<b>Lecture 2 APD and its effects on learning</b>	2Hour
<b>Lecture 3 Models of APD</b>	3Hour
<b>Lecture 4 APD vs ADHD</b>	1Hour
<b>Lecture 5 APD vs Dyslexia</b>	1Hour
<b>Lecture 6 APD vs Autism Spectrum Disorder</b>	1Hour
<b>Lecture 7 Acquired APD by TBI</b>	2Hour
<b>Lecture 8 Challenges in Diagnosis and treatment of APD</b>	3Hour
<b>Lecture 9 APD and Fluency Disorders</b>	1Hour

Director  
Institute of Health Sciences

## **Value Added Course: Auditory Processing Disorders**

Date: 27<sup>th</sup> November-4th December 2020

The Program started by an introduction of the resource person Dr. Lalsa Parepa and what got her interested in the field of Auditory processing disorder.

The Resource person gave an overview of what is Auditory Processing and how various problems in this domain can affect an individual.

### **Aim and Objectives of the program**

The program was aimed at providing the participants with an in-depth knowledge of APD its assessment and management and differential diagnosis with other similar conditions.

The Participants after this program will be able to understand:

- Auditory Processing Disorders
- Assessment and management of APD
- Differential diagnosis of ADP

### **Topics Covered:**

**Lecture 1 APD an overview of the buffalo model**

**Lecture 2 APD and its effects on learning**

**Lecture 3 Models of APD**

**Lecture 4 APD vs ADHD**

**Lecture 5 APD vs Dyslexia**

**Lecture 6 APD vs Autism Spectrum Disorder**

**Lecture 7 Acquired APD by TBI**

**Lecture 8 Challenges in Diagnosis and treatment of APD**

**Lecture 9 APD and Fluency Disorders**

Course Code: IHS-VAC03-15

Course: **Tele-rehab(Audiology and Speech Language Pathology)**

Program Duration: 18Hrs

Course Objectives:

The participants after this course will be able to

- Understand the concepts and importance of Tele rehabilitation post COVID 19
- Carry out proper Assessments Using the software interface.
- Carry out proper Management of specific communication issues using the software interface.
- Understand the importance of such technologies for clinical setups.

Topic	Duration
Lecture 1 Introduction to tele-rehabilitation	1 Hour
Lecture 2 Tools available for tele rehab	1 Hour
Lecture 3 Hearing and Speech animated interactivities technology	2 Hour
Lecture 4 Listening Lab.	2 Hour
Lecture 5 Articulatory Postures (Vowels and diphthongs)	1 Hour
Lecture 6 Speech Station System	2 Hour
Lecture 7 Spectrum overlap	2 Hour
Lecture 8 Pitch meter	2 Hour
Lecture 9 Clinical assessment and therapy for voice, speech and language	2 Hour
Lecture 10 Modules for Speech therapy	2 Hour
Lecture 11 Reading Lab	1 Hour

## **Value Added Course: Tele-rehab(Audiology and Speech Language Pathology)**

Date: 10<sup>th</sup> -16<sup>th</sup> December 2020

The Online Program started with an introduction of Dr. MehboobShahnawaz Chairman, C.E.O. of Danaah Medical technologies pvt.ltd. and his co-workers. The Resource person gave an overview about Tinnitus, Voice therapy; Articulation, Fluency Therapy and how software based programs can be used for assessment and management.

### **Aim and Objectives of the program**

The aim of the program was to provide an economical tool for assessment and management of speech and hearing issues and promote tele-rehabilitation especially in the time of a pandemic.

The Objectives of the program were as follows:

1. Familiarization with the software
2. Assessment and management of various disorders
3. Awareness of how the programs can be used at home by parents for therapy by self-monitoring.

### **Topics Covered:**

- Lecture 1 Introduction to tele-rehabilitation
- Lecture 2 Tools available for tele rehab
- Lecture 3 Hearing and Speech animated interactivities technology
- Lecture 4 Listening Lab.
- Lecture 5 Articulatory Postures (Vowels and diphthongs)
- Lecture 6 Speech Station System
- Lecture 7 Spectrum overlap
- Lecture 8 Pitch meter
- Lecture 9 Clinical assessment and therapy for voice, speech and language
- Lecture 10 Modules for Speech therapy
- Lecture 11 Reading Lab

## **Circular for a Value Added Course on “A Leap beyond Conventional Audiology”**

**IHS/VAC/118/20-21**

This is to inform all the BASLP students that a Value added course on “**A Leap beyond Conventional Audiology**” will be organized by the Institute of Health Sciences online, from January 9, 2021 to January 11, 2021.

### **Topics to be covered**

- Experiencing solutions based Auditory Processing Evaluations and Treatment
- Implantable devices
- Skull vibration induced nystagmus: A screening Tool
- Programing Hearing Aids for different languages
- Cerumen Management
- Vestibular Rehabilitation
- Signal Processing in Hearing Aids
- Achieving patients adherence from neurocognition

Course Code: IHS-VAC03-20

Course: “A Leap beyond Conventional Audiology”

Program Duration: 16Hrs

Course Objectives:

The participants after this course will be able to

- Provide solutions based Auditory Processing Evaluations and Treatment
- Understand recent advancements in Implantable devices
- Understand the use Skull vibration induced nystagmus: A screening Tool
- Understand the importance of Programming Hearing Aids for different languages
- Understand the basics of Cerumen Management
- Understand the recent advancements of Vestibular Rehabilitation
- Prescribe Hearing aids Bias free and understand new algorithms of Signal Processing in Hearing Aids
- Begin understanding, achieving patients adherence from neurocognition

Topic	Duration
Lecture 1 Experiencing Solutions-based Auditory Processing Evaluations and Treatment	2 Hour
Lecture 2 Implantable Devices for Audiological Diseases	2 Hour
Lecture 3 Skull Vibration induced Nystagmus: A screening Tool	2 Hour
Lecture 4 Programming Hearing Aids for Different Languages	2 Hour
Lecture 5 Cerumen Management	2 Hour
Lecture 6 Vestibular Rehabilitation – Current status	2 Hour
Lecture 7 Twenty-first Century Signal Processing in Hearing Aids: What is the Evidence of Benefit?	2 Hour

## **Value Added Course: “A Leap beyond Conventional Audiology”**

Date: 9-11<sup>th</sup> January 2021

The Program started by invoking the blessings of God through a lightning the lamp ceremony by Principal I.H.S., and the dignitaries, and a devotional song.

The Resource person gave an overview of Vestibular system and disorders and how this branch of audiology is evolving.

### **Aim and Objectives of the program**

The participants after this course will be able to

- Understand the concepts of anatomy and physiology of vestibular system.
- Carry out proper Assessment of a vestibular disorder.
- Understand the concept and implementation of management programs for various conditions affecting the vestibular system.
- Establish connections between test findings to pin point the diagnosis of a disorder clinically.
- Understand the importance of a team-based management.

### **Topics Covered:**
