## Community-based Teaching Learning Activities:

Under the community-based teaching and learning activities, IHS have conducted multiples therapeutic camps, including different aspects of health care especially, general health check-ups, physiotherapy, speech and hearing check-up , etc. at different districts within the state of Odisha. Those camps involved assessment of the patients with difficulties, primary diagnosis, advice of treatment, and referrals accordingly, that were conducted by the students under the guidance of the faculties and professionals of the IHS. Under this activity program, HIS was able to reach to the remote areas and identified people with difficulties. We were also able to extend our help to the person in need in both urban and rural areas. Along with the achievement of the community based rehabilitation, the students were also benefited by being part of it.
