PROPOSAL

Background and Justification: Learning disability, learning disorder or learning difficulty is a condition in the brain that causes difficulties comprehending or processing information and can be caused by several different factors. Individuals with learning disabilities can face unique challenges that are often pervasive throughout the lifespan. Depending on the type and severity of the disability, interventions, and current technologies may be used to help the individual learn strategies that will foster future success. Some studies in India calculated the prevalence of specific learning disability to be 3-10%. In Chandigarh the prevalence was found as 1.58% and in southern India it was 6.6% and Karnataka showed the prevalence as 15.17%. Hence Learning disability is an important concern in young school aged children. Early identification of such students can help in early intervention and suitable modifications in teaching techniques.

Aim of the programme: The Aim of the CRE program is to help the professionals develop a better understanding of the Learning Disability and how it is different from other Developmental disorders.

Content of the programme: Definition, Characteristics Early Indicators Primary School Secondary School, what is not LD and Bilingualism, Differential Diagnosis ADHD, ASD, Speech and Language Disorders, Emotional and Behaviour Disorders Central Auditory Processing Disorder, Physical Impairments; assessment and management and team approach.

Name of the resource person- Internal: Prof. Satya Mahapatra

Dr. S.N. Mishra

External: Dr. Debasis Panigrahi, Dr. Pranav Mahapatra

Dr. Subrانشu Shekar Jena, Dr. Swarnalata Panda

Co-ordinator : Prof. Satyanarayan Mahapatra (Audiologist and speech language pathologist)

Professionals to be present in the CRE: Special Educators, Psychologists, Occupational Therapist, Social worker and Speech Language Pathologist.

Methods: Oral presentations through online mode, Handouts, Power point presentation and video presentation.

Desired outcome: The participant by the end of the CRE program will have better understanding of the recent advances in the field of Learning Disability and will be able differentially diagnose with other developmental disorders.
