Definition

Posture is the attitude assumed by the body either with support during muscular inactivity, or by means of the co-ordinated action of many muscles working to maintain stability

INTRODUCTION

- Static and Dynamic Posture
- Posture Control
- Major Goals and Basic Elements of Control

Static and Dynamic Posture

- Static- body and its segments are aligned and maintained. Eg's Sitting, Standing.
- Dynamic- body or its segments are moving. Eg's Walking, Running

Erect bipedal stance

Advantage: freedom for upper extremities

- Disadv: -increases work of heart
- increase stress on vertebral col., pelvis; LE
 - reduces stability
 - small BOS and high COG

INSTITUTE OF HEALTH SCIENCES
DEPARTMENT OF PHYSIOTHERAPY
CLINICAL PRESENTATION
SUMMARY REPORTS

Clinical presentation is an essential part of the academic curriculum and provides platform for the students to demonstrate a deeper clinical understanding of Patho-physiology, clinical presentation of a disease , evaluation, diagnosis and rehabilitative protocols. Further engaged in fruitful discussions with other students and faculties.

Clinical presentation is a mandatory Performa for every semester topics are in accordance to their syllabus that is to be individual of the batch.

The presentation focuses on probing at and evaluating a presenter's clinical knowledge and hence in turn is a process of creating a better and more clinically aware professional.
