

ANNUAL REPORT

Founder's Message

Spinning a complete ecosystem, where the disability rehabilitation is handled for tangible solution is not an easy task. Margdarsi has tried to work towards creating a complete ecosystem weaving the component parts together. The institution based clinical services required building infrastructure, well equipped clinic, evidence-based practices supported by established protocols.

The rewards of such efforts are seen in many children dropping their diagnosis of disability and the joining mainstream as normal children. The outreach services on the other hand required team of dedicated people to deliver services at the doorstep of the people in far flung areas. That too enduring the uncertainties while seeking cooperation from public and government officials to deliver services. The manpower development program is aimed at filling the void of qualified professionals in Audiology, Speech Language Pathology, Special Education, Physiotherapy and Rehabilitation Sciences, so that they can affect the delivery of rehabilitation services effectively. But the qualified professionals required to be future ready with updated technology solutions, not limited to past knowledge and stereotypes in skills.

Thus regular Continuing Rehabilitation Education Programs, workshops, Conventions like International Symposium on Audiological Medicine and Conclave of Research, Innovation and Entrepreneurship have been hosted by Institute of Health Sciences. The quality of the academics and overall functioning has been benchmarked by the NAAC team as the one and only institution under Rehabilitation Council of India to excel as a standalone institute in the country. The research and innovation needed to be conducted to delve deeper for clinical insights and discover solution for the lifetime maladies. Many research papers are published by the faculty in publications of repute while the Institute itself has published ISAM Journal and Indian Journal of Communication Sciences. Margdarsi has been trying to stand up to the demand of the profession on every front. The challenges that are known as well as that are unprecedented like the Corona pandemic, this organisation has braved it all. Margdarsi continues to augment human life and ameliorate suffering.

Integrated Rehab – Physiotherapy

Physical disorders when become unmanageable cause much sufferings to the person concerned and also to the family. A disabled, especially those who are non-ambulatory, require a lot of professional intervention and also adequate care giving. For such people who are affected by Paralysis, Head injury, spinal cord injury, cerebral stroke, neuro degenerate conditions like Alzheimer's, Parkinson's, Multiple Sclerosis etc require residential facilities and intensive multi modal therapy. Chandaka Village based campus of IHS has been upgraded to accommodate such clients. The Integrated Rehabilitation Centre is functional with facility to deliver optimal service to chronic cases.

CHRONICLES

April - 2021

- **06.04.2021 and 07.04.2021**
Visit of NAAC peer team & on their assessment I H S got accredited with B++ grade.
- **19.04.2021 and 20.04.2021**
Evaluation team of RC I visited I H S for the assessment & approved the new course B.Ed Spl. Edn (Autism)
- **27.04.2021**
Members of Rotary Club visited I H S campus for a noble cause.
- **28.04.2021**
Faculty Development Program on the topic "Thinking Beyond Text Book"

Department of Physiotherapy aims at preventing functional disorders and/or disability. Equipment /instruments help professionals to increase, maintain or restore patient's physical mobility, function, and strength. This makes use of electrotherapy, evidence-based kinesiology, exercise prescription and shockwave mobility to treat chronic conditions of the bone joints and soft tissues. Supplemented by prosthetic and mobility aids, appliances, dietary intervention, mental health care, Margdarsi tries to be holistic in its approach.

Audiological Rehab

Audiological Medicine - Rehabilitation Care for Hearing Impaired

Hearing loss, starting with four infants in every thousand at birth, affects every second elderly person in their sixties. The loss of hearing affects life of the deaf persons in multiple ways. I H S provide diverse professional services. From neonatal screening to identify the hearing impaired children early to conducting hearing loss assessment, electrophysiological tests for differential diagnosis, diverse audiological rehabilitation, fitting the deafness affected with digital hearing aids and providing AVT therapy for those fitted with cochlear implants.

The professional care helps in restoration of functional skills and improving the quality of life for hearing impaired.

- Congenital deafness
- Hearing loss among children & adults
- Hearing loss in Elderly
- Conservation of hearing
- Audiological diagnostics
- Audiological rehabilitation
- Auditory training
- Hearing Aids
- Cochlear implants
- Vestibular diagnostics
- Vestibular rehabilitation
- Tinnitus Training
- CAPD rehabilitation
- Neuro Audiology

BRAIN FITNESS

Mental Health issues have become a big problem in the society. A lot of people suffer depression, obsessive compulsive disorders, stress-anxiety, panic attacks to emotionally induced illnesses. Teenage addiction, antisocial or aggression, conduct disorders, dropping out of school and such other issues need professional attention.

Margdarsi established the Brain Fitness center to provide consultation and therapy to the affected person and counselling to the caregivers in the family. Blending Psychotherapy with traditional remedies like Yoga and dietary supplements are tried as holistic care to restore emotional homeostasis.

CHRONICLES

22.07.2021	Contribution of IHS experts to Master trainer program for orienting grassroots health workers in disability identification under SSEPD dept. Govt. of Odisha.
14.09.2021	Farewell Party by the students of IHS
07.03.2022	BSSO training programme – Gopabandhu Academy of administration trained BSSO of Odisha in the Disability matter. Prof Satya Mahapatra and Mrs. Nalini Mohanty acted as resource persons to train the Officer of Govt. of Odisha.
02.04.2022	Fresher's Party – New recruits into the under graduate programs at IHS received a warm welcome by the seniors.
04.06.2022	CSR Support – Rourkela Steel Plant, under the Steel Authority of India, supported Margdarshi with an ambulance for the Special Children to pick up for therapy and drop at their home after treatment.

ACADEMIC PROGRAMS (OLD)

1. BACHELOR IN AUDIOLOGY & SPEECH LANGUAGE PATHOLOGY

2. BACHELOR IN PHYSIOTHERAPY

Margdarshi established the I H S in 1999, realizing the acute shortage of professional manpower in India to deal with various disabling disorders and disabilities. It started with BASLP program to train Audiologists and Speech Pathologists with due approval of Rehabilitation Council of India. It started the Bachelors of Physiotherapy program in 2004 to develop manpower for handling physical disorders and physical disabilities with due recognition of Govt. of Odisha and affiliation of Utkal University. The alumni of I H S are now serving the vulnerable people in different clinical establishments across the country as well as migrated abroad to USA, EU, Australia and the middle eastern Countries.

CHRONICLES

December - 2021

- **03.12.2021**
World Disability Day was celebrated at Institute of Health Sciences, Chandaka campus.
- **18.12.2021**
Special training programme was organized by I H S for the overall skill development of Special educators of the Organisation.

ACADEMIC PROGRAMS (NEW)

The Institute of Health Sciences has decided to begin new programs for manpower development in disability rehabilitation to cater to the perceived needs. These are M.R.Sc. and B.Ed (ASD)

MRSc (MASTERS IN REHABILITATION SCIENCES)

There are 21 different types of disability and various domain specific rehabilitation programs to render services. But the overall administration or management requires professionals with overview of various sectors in rehabilitation. Thus is this MRSC program, aimed at filling the void of managerial manpower in the disability rehabilitation sector.

BACHELOR IN SPECIAL EDUCATION (Autism Spectrum Disorder)

Autism affects one in every 30 children. Without proper rehabilitation, they will be forced to live life of a handicapped. Hence, I H S decided to start a Special Education Degree program in ASD. This will cater to the need of Special Schools and Integrated Schools where Autism affected children are admitted.

NAAC ACCREDITATION

National Assessment and Accreditation Council, NAAC stands for benchmarking the standards of the institutions. Institute of Health Sciences has secured B++ grade in the category of Allied Health Sciences in the first cycle. This is the best performance in India for a standalone institute. It will continue to improve its standard by focusing on research and innovation in disability rehabilitation and allied health sciences in future.
