Seminar on Intellectual Property Rights with Focus on Copyright & Trademarks

Date: 11/11/2022

Venue: Smart Classroom, Academic Block

Participants: BASLP 1st Semester, BPT 1st & 3rd Semester and all the staff & faculty members of BASLP & BPT.

A seminar on IPR was organized by the Department of Audiology & Speech language Pathology and Physiotherapy on 11th November 2022. Mr. Debasish Kumar Panda (Advocate) was the resource person. He gave a brief introduction on IPR and explained the various related terms such as copyrights, Trademarks, Patent, etc.

Objective of the seminar:

- Create awareness about IPRs,
- Copy rights, Trademarks and patents
- Practical applications of IP such as patent drafting, patentability search and freedom to operate search, validity/invalidity search, and evidence of use analysis.

Outcome of the Program:

The participants gained knowledge on IPR Overview: What is Importance of IPR Intellectual Property, Types of IPR and their Importance, Focus and mandate of each IPR Patents: What are Patents, patent for technical invention, process of patent protection, parts of a patent application, aspects relating to relating conducting patent searcher, preparing patent applications.

Seminar on Intellectual Property Rights with Focus on Copyright & Trademarks

Topic- Seminar on Intellectual property rights with focus on copyright and trademarks.

WORKSHOP ON ART OF WRITING A RESEARCH PAPER

Date: 16/12/2022

Venue: Smart Classroom, Academic Block

Participants: BASLP 1st & 3rd Semester Semester, BPT 1st and all the staff & faculty members of BASLP & BPT.

A workshop on art of writing a research paper was organized by the Department of Audiology & Speech language Pathology and Physiotherapy on 16th December 2022. Mr. Chandan Kumar (Advocate) was the resource person.

There is consistent demand on academicians to produce good quality research papers. This demand is institutionalized in the requirements laid down by the regulatory bodies and the strategic attempts by educational institutions to manage research. Keeping this demand in mind, the objective of this workshop is to unpack what constitutes a great research paper and outline the pleasures and pitfalls of writing it. With the help of some characteristic examples and activities, the workshop will serve as a practical guide to the art of writing papers. 9 simple steps of Research Writing:

1. Find a journal – Be specific
2. Prepare a persuasive introduction – Introduce your topic to the reader
3. Write the methods – Capture the methods used
4. Work on Results – Present the facts – it doesn't change
5. Compile the discussion – Relate your results to the contemporary research
6. Write a conclusion – Justify the significance of your work
7. Compose an apt and precise topic – Make it captivating
8. Write the Abstract.
9. Use Keywords – it enhances your visibility

What to bring:

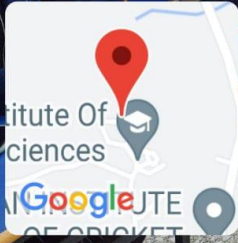

1. Any tentative research topic of your interest.
2. One base paper related to your area of research.

Major Takeaways

- An understanding of desirable practices in research
- Comprehending what reviewers want
- Dispelling some major research myths
- Looking forward to research with greater confidence

Workshop Contents

- Generating and choosing an idea
- Connecting with the reader
- Literature review (with specific focus on review based papers)
- Making claims and supporting them
- Drafting a research paper
- Citations and referencing
- Abstract, title and keywords
- Plagiarism and ethics of paper writing
- Top reasons for rejection of papers

Symposium on Audiovestibular Medicine & Research Methodology

Date: 27/01/2023 and 28/01/2023

Venue: KIMS HOSPITAL

Participants: Audiologist and Speech Language Pathologist- RCI registered professionals

Research is a process of systematic inquiry that entails collection of data, documentation of critical information, analysis and interpretation of that data/information, in accordance with suitable methodologies set by specific professional fields and academic disciplines. In the field of medicine, research plays an important role in discovering new treatments and make sure that we use existing treatments in the best possible way. Over the last three decades the importance of research in all fields of medicine has been increasingly recognized. The nature of research ranges from basic and clinical to field based and applied research and can be preclinical, clinical and Para-clinical or diagnostic, preventive and therapeutic in application. All universities granting postgraduate medical degree as well as the Rehabilitation council of India consider research or thesis work as an obligatory requirement. There is also an implicit expectation of their ability for appraisal and utilization of new scientific knowledge to improve clinical practice and scholarly contribution to development and research in the chosen field of medicine. Hence training in research methodology becomes essential for all the post graduates to encourage them take up research seriously. In this regard, the Dept. of Audiovestibular Medicine, Institute of Health Sciences conducts ‘Symposium of Audiovestibular Medicine & Research Methodology’ for all Postgraduates of Audiology and Speech Language Pathology on 27th and 28th January 2023.

Audiologist, Speech language Pathologist- RCI registered professionals attended the symposium. The conference was inaugurated by the Honorable MLA and Telangana Government Whip Smt. Gongidi Sunitha, Prof. Dr. Satya Mahapatra, Mrs. Pushpa Srinivas, Nagendra Kanikapati, Dr. Rajender etc. On that day Prof. Dr.Satya Mahapatra was felicitated by Dr. Imad khan Ruman and Dr. Nagendra Kanikapati. Dr. Janardhan Rao Jagini, senior ENT surgeon at KIMS hospital attended as resource person and Guest of Honor.

Dr. Janardhan Rao Jagini, senior ENT surgeon at KIMS hospital presented the first session on the ‘**Cochlear Implant Surgery and it’s Complication- Audiologist’s Prespective**’. In this session he talked about the role of and audiologist during the cochlear implant surgery and after the surgery. In this session they provided the detailed information about the CI surgery and their process because during the surgery not only the ENT surgeon the audiologist also plays an important role.

The second session was given by the **Dr. Shiva Prasad Boddupally** in which he talked about the ‘Role of an audiologist in the Cochlear Implant Program’. They also focused on

supporting the role of an Audiologist in the assessment as well as the management of the CI surgery. In this session, he talked about surgery counselling and expected speech and language outcomes. To confirm the integrity and functioning of the implant they have performed neural response telemetry (NTR) . He did explain about the role of an audiologist while Activation and mapping of speech processor. For the coming scenario in India his major focus is upon training the audiologists for Cochlear implant program in and around telegu states.

The third session was given by **Dr. Pragnya P. Prusty** in which she discussed about the ‘The Vestibular System in Space’. In this session she talked about the Orientation and Integration of human body, exposure to microgravity and the conflicts faced by the astronauts. She explained about “ Space adaptation Syndrome “ which is a kind of motion sickness that can occur when one's surroundings visually appear to be in motion, but without a corresponding sense of bodily motion. In this session, Her major focus was upon the broad insight about the role of Audio- vestibular Specialists in Human Space Missions and issues faced in microgravity.

The Fourth session was given by **Dr. Reuben Jebaraj Prabhu** in which he spoke about the ‘Audiological insights into Hearing Aid fittings- Theory to Practise’. In this session, he talked about satisfying the patient’s needs with the available audiological advancements with an increase in noisy environments for the hearing impairment. As the routine diagnostic procedures like PTA and speech audiometry , have not been a good predictor of hearing aid outcomes . Therefore, in the session he focused on various other audiological tests namely TEN (Threshold Equalizing Noise) test, SNR (Signal to Noise Ratio)-50 and ANL (Acceptable Noise Level) test in predicting the benefit and use of hearing aid.

The Fifth session was given by **Dr. Nitish Srigiri** in which he talked about the ‘Changing Phase of dispensing Hearing aids ’ . In this session he discussed about the evolution of hearing aid dispensing, from traditional in person fitting to the rising usage of remote and self-fitting options which gave an overall look on the overview of the evolving phase of hearing aid dispensing and its consequences for the field of hearing healthcare.

The sixth session was given by **Dr. Hari Prakash Palaniswamy** on ‘Cognitive Hearing’. In this session he highlights the role of cognition using some key hearing disorders and listening conditions. He explained in detail about “the fluid Intelligence” which understands the auditory processing during different listening situation.

On the second day of the conference (28.01.2023), the IHS staff Ms. Niharika Dash, Mr. Raj Sekhar, Mr. Vivek Kumar and Ms. Trupti Lata Baral were felicitated by Dr. Nagender Kankipati, Dr. Imad Khan Ruman, Dr. Rajendra Ku. Porika for the organizing members of the ISAM.

The First session was given by **Dr. Sameena Khan** on Hyperacusis – A dilemma to Audiologist’, In which she talked about the problems faced by the audiologist as they don’t feel knowledgeable enough to provide care to patients with decreased sound tolerance. Although hyperacusis can occur in isolation, it is most often associated with tinnitus and hearing loss. If Undiagnosed sound tolerance disturbances can seriously compromise hearing aid intervention

outcomes, reduce satisfaction and safety with services received. Her major focus was on the far-reaching audiologists to better understand hyperacusis in terms of clinical manifestations, assessment guidelines, and management strategies.

The Second Session was given by **Dr. Harvey Dhillon**, who gave a detailed explanation on 'Auditory Processing Disorders. In this session, he explained about the significant difficulty in understanding speech in the presence of background noise and the difficulties faced by the children to follow multi step direction and localizing sound. He gave detailed assessment and management strategies for APD.

The Third Session was given by **Dr. Spruha Mahapatra** on 'Differential diagnosis of Vestibular Disorder '. She gave an introduction and diagnostic evaluations on various vestibular disorders such as multiple sclerosis , BPPV, Meniere's disease , Vestibular neuritis, etc .

The fourth session was given by **Dr. Sudhir Bhanu Suri** on the 'Hearing Conservation Program' where he spoke about the preservation of hearing within the range of normalcy despite prolonged exposure to noise in the industry. He explained the components of HCP essentially include monitoring the environment, audiometric testing, provision of hearing protectors, education and record keeping.

The fifth session was given by **Dr. K.R Meghanandh** on 'Relation between Otology & Audiology – from an ENT specialist point of view'. Here he explains about the otologist diagnosing and treating the hearing and vestibular disorder as a highly trained physician or surgeon. As not all otologist perform surgery that's why they often work closely with audiologists to treat certain conditions of the ear.

The Sixth session was given by **Dr. Gish Chacko** on 'Relation between Otology & Audiology – from an Audiologist point of view'. Here he explains about importance of having an audiologist for the treatment of hearing loss and balance issue non medically by using various interventions.

**INSTITUTE OF HEALTH SCIENCES

Symposium of Audiovestibular Medicine & Research Methodology

Date: 27/01/2023 and 28/01/2023

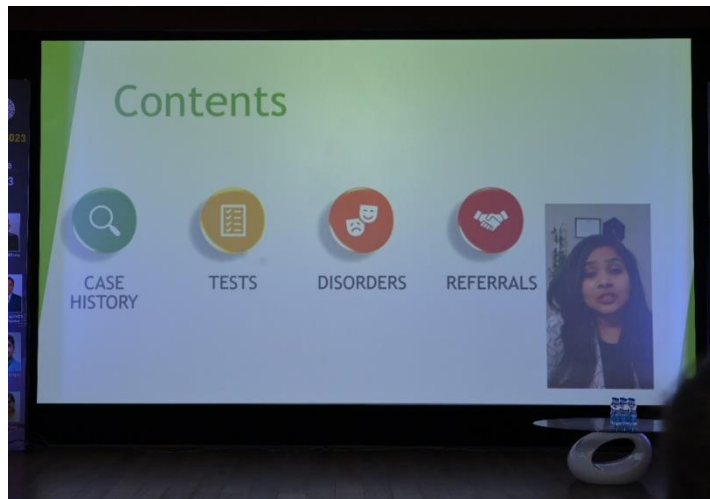

Agenda

27/01/2023

Time	Resource Person	Topic
10:00am-11:00am	Dr. Janardhan Rao Jagini	Cochlear Implant Surgery and it's Complication- Audiologist's Perspective
11:00am-12:00pm	Dr. Shiva Prasad Boddupally	Role of an audiologist in the Cochlear Implant Program
12:00pm-1:00pm	Ms. Pragnya P. Prusty	The Vestibular System in Space
2:00pm-3:00pm	Dr. Reuben Jebaraj Prabhu	Audiological insights into Hearing Aid fittings- Theory to Practise
3:00pm-4:00pm	Dr. Nitish Srigiri	Changing Phase of dispensing Hearing aids
4:00pm- 5:00pm	Dr. Hari Prakash Palaniswamy	Cognitive Hearing
28/01/2023		
10:00am-11:00am	Dr. Sameena Khan	Hyperacusis
11:00am-12:00pm	Dr. Harvey Dhillon	Auditory Processing Disorders
12:00pm-1:00pm	Dr. Spruha Mahapatra	Differential diagnosis of Vestibular Disorder
2:00pm-3:00pm	Dr. Sudhir Bhanu Suri	Hearing Conservation Program
3:00pm-4:00pm	Dr. K.R Meghanandh	Relation between Otology & Audiology – from an ENT specialist point of view'
4:00pm- 5:00pm	Dr. Gish Chacko	Relation between Otology & Audiology – from an Audiologist point of view

Workshop on Data Analysis using IBM SPSS (Statistical Package for Social Sciences Software)

Date: 16th to 18th March 2023

Venue: Smart Classroom, Institute of Health Sciences, Chandaka main campus

Number of Participants: 45 (24-Offline, 21-Online)

A training workshop on the usage of **Statistical Package for Social Sciences (SPSS) software** was organized on 16th -18th March 2023 at Institute of Health Sciences, Chandaka, Bhubaneswar, through Hybrid mode (both online and offline). Dr Pratap Kumar Jena (Biostatistics and Research Methods, Associate Professor, KSPH, KIIT-DU) AND Dr Alpana Mishra (Associate Professor, Community Medicine, KIMS, KIIT-DU) was the Resource person for the three-day's workshop. The objective of the workshop was to provide intensive training on the everyday use of SPSS software for data analysis. The direct beneficiaries of this workshop were the researchers using empirical research, students writing their PhD thesis, students doing internally or externally funded-projects along with a number of faculty members and staff of the varsity. The workshop received an overwhelming response in terms of student and faculty participation.

The first day of the workshop began with a warm welcome by the Mr. Vivek Kumar, Assistant Professor, Dept. of Speech and Language. The workshop started with a Welcome Address by Prof. Satya Mahapatra, Founder-Director of IHS who welcomed and encouraged the participants to make the best use of the training workshop. Each day was divided into two sessions. The first session began with introduction of types of data and scale of measurements. The speaker explained the importance of knowing the data type and data scale as this information is vital in selecting statistical techniques and methods for data analysis. After the interactive coffee break in the foyer area, the second session began with an introduction to SPSS software. All the participants were provided with workshop material as well as web-link to download trial version of the software in advance. This helped the participants to have a hands-on experience of the software. The speaker explained how to code and enter data and data filtration.

Day 2 began with the missing values, in case of missing values, any of the following values can be used: mode, median, beta coefficients or closer moving average methods. Cross-tabulation, chi-square test statistic and hypothesis testing was also introduced and its importance and reasoning was discussed in detail.

Day 3 began with an introduction to measures of central tendency, tests of normality like Kolmogrov-Smirno and Shapiro Wills test. This was followed by understanding the difference between parametric and non-parametric tests. An intensive discussion on role and importance of correlation began after coffee break. The speaker introduced four methods of calculating correlation namely Karl Pearson, Spearman,. Thereafter the session continued with a detailed discussion on formulation of hypothesis,

application of t-test, one-way ANOVA, Mann Whitney test, Wilcoxon test, Kruskal Wallis test, KMO tests and the workshop ended with a brief discussion on Factor Analysis.

Dr. Rituparna Mohanty (Assistant Professor, Dept. of Physiotherapy) gave the vote of thanks. Mrs. Subhasmita Sahoo (Assistant professor, Dept. Audiovestibular Medicine, Principal in-charge) felicitated Dr Pratap Kumar Jena and Dr. Alpana Mishra with a memento. A group photograph along with all the participants and organizers was taken towards the end. The workshop ended at a memorable note as the participants shared their positive feedbacks with the resource-person and the organizers.

AGENDA

Workshop on Data Analysis Using SPSS

16th – 18th March 2023 (2PM to 5PM)

SL. NO.	TIME	TOPIC	RESOURCE PERSON/ FACULTY
1	PRE- WORKSHOP MEETING (15th March 2023)		
	4.00PM to 4.30PM	Preparatory Meeting for Workshop	Dr. P K Jena
2	DAY - 1 (16th March 2023)		
	2.00PM to 2.10PM	Introduction	Mr. Vivek Kumar
	2.10PM to 3.00PM	Basic Approach to Data Analysis	Dr. P K Jena
	3.00PM to 4.00PM	Data Analysis for Clinical Studies	Dr. A Mishra
	4.00PM to 5.00PM	Hands-on SPSS -1	Dr. P K Jena
3	DAY - 2 (17th March 2023)		
	2.00PM to 3.00PM	Univariate Analysis using SPSS	Dr. P K Jena
	3.00PM to 4.00PM	Hypothesis Testing & Bivariate Analysis	Dr. A Mishra
	4.00PM to 5.00PM	Hands-on SPSS -2	Dr. P K Jena
4	DAY - 3 (18th March 2023)		
	2.00PM to 3.00PM	Multivariate Analysis	Dr. P K Jena
	3.00PM to 4.00PM	Hands-on SPSS-3	Dr. P K Jena
	4.00PM to 4.45PM	Summary of Session	Dr. P K Jena
	4.45PM to 5.00PM	Vote of Thanks	Ms. Rituparna Mohanty
